A HUGHES & SON LTD. CASE STUDY

Work Carried Out:

Insulation and cladding of a cooker vessel and additional pipework.

Customer Benefits:

Aesthetically pleasing, cost saving, improved health and safety.

Customer Feedback:

“During this project, and many others to increase our facilities capabilities for production, we required thermal insulation to improve the performance and efficiency of our system. Rilmac were especially helpful in their approach to the work, not only did they provide a quotation, but they also showed us the savings we would make when the insulation was applied. The work was completed in a timely and efficient manner, with all considerations towards health and safety observed. The operatives that came to site were extremely thoughtful and did everything they could ensure that our operations on site were not effected by their works.”
