Asbestos Services

ASBESTOS REMOVAL & DEMOLITION CASE STUDY

Rilmac were contracted to remove asbestos cement and demolish remaining structure of four dilapidated farm buildings and a garage block. Works involved hand removal of asbestos and machine demolition of the remaining structures. We had a specialist waste firm in to remove contaminated water. All works were completed in a 7 day programme by Rilmac employees. Project was completed on time and in budget.

"Rilmac removed a hazardous, dilapidated building for us efficiently, very professionally and at a competitive price. The building in question was a health and safety risk mainly because of large amounts of broken asbestos. I needed experts to dispose of it, and in doing this Rilmac provided an excellent service."
