

# AUTOPLACE PS6

**R Project:**  
Autoplace PS6

**R Client:**  
Parker Plant

**R Scale:**  
7126.05kg

**R Destination:**  
USA

**R Materials:**  
Mild Steel

**R Number Required:**  
3 sets

## CASE STUDY

Supplied unpainted as separate units for final assembly the Autoplace PS6s were manufactured by Rilmac Fabrication in their Lincoln workshop and transported via lorry. The unit is designed for demanding operations across diverse applications with variable width placing and spreading, and dual lane spreading in a single pass.

The end use of the Autoplace PS6 is concrete placing and smoothing for road building projects.
