Lincoln UK

BIFRANGI 70 TONNE PRESS CASE STUDY

Bifranghi UK, a supplier of parts to the power generation industry, installed one of the world's largest screw presses at its Monks Road site in Lincoln UK.

The installation of the 70-tonne screw press allowed the firm to expand its production of engine crankshafts. Rilmac Fabrication was involved in providing and fabricating the 16 metre diameter steel baseplate for the completion of the concrete foundations. The project also included on-site installation and welding.
