CONTAMINATED LAND REMEDIATION CASE STUDY

Rilmac were employed by a major power distribution company to remediate contaminated land in order to facilitate the refurbishment of a power sub-station.

Our Approach:

Rilmac were employed to remove contaminated land in order to facilitate the refurbishment of a power sub-station for a major power distribution company.

This large scale phased contaminated land removal project on a live electricity distribution sub-station was completed on time, within budget and to excellent Health & Safety Standards.

Customer Benefits:

By working closely with the client and Rilmacs in-house Health & Safety team, the contract manager was able to effectively manage the project to keep the site up and running during the remediation process. This enabled the client to continuously maintain the power supply without incurring any penalties for loss of service.
