Building Contractor

## LINDUM GROUP CASE STUDY

As part of the M&E and roof replacement works at a large scale factory in the city of Lincoln, Rilmac were employed to remove the internal asbestos insulating boards from the roof structure. Working progressively throughout the factory, with multiple enclosures, in a 24/7 live factory environment, Rilmac had up to 24 men working on-site at any one time. The programme of works was developed in line with the requirement of the reinstatement programme, and this was achieved at each project milestone.
