NOTTINGHAM BIOSCIENCES CASE STUDY

Nottingham Biosciences had an overall value of £25m and was driven by Paul Smith (Willmott Dixon) who in our opinion is a very knowledgeable Operations Manager, making the day to day running of such a large project both manageable and precise. Our site Supervisor Gary Brown and the Willmott Dixon team worked together to ensure that the project was completed on time and to the highest standards of Health and Safety. The Biosciences Building was recently awarded and acknowledged as a truly defect free handover.

Customer comments:

"Rilmac were an integral part of the team on Biosciences project for WDC, the quality of service/work/reliability and Health and Safety were exemplary and I would have no hesitation in using and recommending Rilmac for future projects"

Paul Smith Operations Manager

Defect Free Handover - YES

"You provided honest to be very good at managing this tight site early, often using his initiative to identify and beyond the immediate construction stage and of the wider design and expectations of the building necessary. We are now using the Biosciences Building as a benchmark for future developments in Nottingham. It demonstrates the excellent hand and build quality we want to achieve in a green-field location and is a significant recognition site."
