

RUSTLER 12

- R Project:**
Rustler 12
- R Client:**
Parker Plant
- R Scale:**
8.357m x 17.557m
x 3.571m
- R Destination:**
USA
- R Materials:**
Mild Steel
- R Number Required:**
4
- R End Use:**
Road Building

CASE STUDY

One of the largest projects Rilmac Fabrication have completed for Parker Plant. The Rustler 12 was built as a series of components, painted with primer, completed on the trailer chassis with the tractor unit coupling up and driven from the workshop to Leicester. Designed and built to work with ready-mix producers and allowing for better truck utilisation with a highly mobile, self-erecting remote concrete batch plant. The plant can be configured to suit most ready-mix applications with numerous aggregate and cement storage options.
