Fabrication

SHEET METAL FABRICATION

Rilmac Fabrication has maintained a strong reputation since 1968 as a quality orientated sheet metal fabrication company in materials, workmanship and customer support. Today, Rilmac provide a wider range of services than most companies in the industry, and also carrying out heavy fabrication work.

Specialists in precision stainless steel, aluminium, brass and mild steel fabrications, Rilmac fabricate goods from basic brackets through to complex metal enclosures, cabinets, guards louvers and duct work. Many years of expertise and experience eliminates problems and assists in producing a quality finished product.

Employing the latest technologies and machinery to manufacture all products Rilmac sheet metal engineers have experience in every aspect of sheet metal work including rolling, welding, ductwork, cutting, folding and design. There is a long-standing team of in-house experienced sheet metal fabricators and sheet metal engineers working to exacting quality standards.
