

TRAILER & CHASSIS FABRICATION

Dealing with many of the leading trailer and vehicle chassis manufacturers throughout the UK, Rilmac Fabrication has manufactured a variety of products in this specialist field. Working in this fast moving market for many years, Rilmac have demonstrated that they can be relied upon to offer cost effective chassis and trailer assemblies.

This has included standard and custom trailers including step-frame low-loaders, plant bodies, rigid neck semi trailers and truck beds. Rilmac have regularly been called upon to build specialist one-off low bed step frame trailers. These are a low volume specialist product, which are used for the carriage of aircraft engines, aircraft fuselages and other similar loads.
