

Service:
Steel Fabrication

Location:
Tata Steel, Scunthorpe

TATA STEEL CASE STUDY

Rilmac Fabrication completed the fabrication and supply of two sets of fan casings with associated duct work. The units were successfully trial assembled in the workshop prior to installation at Tata Steel, Scunthorpe.

In addition to the diverse range of steel fabrications produced, Rilmac were also involved in the supply of pipe-work modification and installation on this project. This included work on fan water pipe-work plus modification of the nitrogen pipe-work required for this site up-grade.
